itopia

Improve Patient Outcomes with Virtual EMR on Google Cloud

itopia on Google Cloud helps healthcare providers accelerate the transmission of critical patient data in real-time, accessible from anywhere.

Rapidly Access Medical Imaging on Any Device

- Accelerate urgent treatment decisions and recommendations by having immediate access to patient data transmitted from clinics and labs.

- Virtualizing your EMR applications with itopia allows you to pair your existing IT environment with the high-speed and security of Google Cloud.

- Transmit high-resolution images and large file sizes in minutes, enabling medical professionals to act quickly and provide the best patient care.

Enjoy Simplified Management and Slash IT Costs

- Manage any number of hospitals, clinics, labs, and research facilities from itopia's unified, cloud-native console.

- No more endpoint management. With itopia, you control all sensitive patient data with HIPAA-compliance on Google Cloud's network.

- Only pay for what you need. Shift from costly, CapEx-intensive on-prem VDI and harness the lightweight scalability of the cloud.

Success Story

NEUROCARE OF LOUISIANA

✓ Existing IT assets were virtualized on GCP, enabling the delivery of EEG apps (NeuroWorkbench) and data to neurologists.

✓ The time it took for physicians to share and assess medical imaging was reduced from days to minutes.

Unlock Tremendous Value with an OpEx Model and Automation

No more upfront CapEx for procuring servers, storage, networking, power, cooling, or refreshing of hardware.

itopia's App Streaming is a low-cost subscription-based price for clinics. No runaway cloud fees.

Reduce the IT burden on staff by 65% with itopia's automated lifecycle management.

Technical Differentiation

- Tier 1 sysadmins can quickly deploy **EMR apps on Windows 10 and Windows Server virtualized environments in 24 hours** -- all from a single, unified console.

- Easy segmentation of hospitals, clinics, labs, and research facilities with custom images of apps. **One-click onboarding of employees** with centralized management.

- Intelligently autoscale compute resources up and down for optimal performance. **Automatically power VMs on and off to match real-time end-user demand.**

- **All apps are streamed securely through the browser --** and all sensitive patient data is stored securely within your GCP project with HIPAA-compliance. itopia's automation platform does not have access to your data.

Medical professionals enjoy a one-click login to their EMR apps
