

Launch Windows 10 VDI on GCP's Global, High-Speed Network

itopia on Google Cloud enables enterprises to deploy full-scale virtual desktops and apps to distributed workforces in minutes -- not months.

The Future of End-User Computing on the Best Cloud Network

- Deliver any application to workers on any device, anywhere. Low-cost Chromebooks can launch virtual Windows 10 apps powered by GCP's highest-performing VMs.
- Windows 10 VDI environments run on the same secure network that underpins all Google products serving over 1B active users worldwide.
- Dynamic end-user routing ensures your workers automatically connect to the nearest GCP data center – guaranteeing the lowest-latency.

Automate Lifecycle Management and Slash VDI Infrastructure Costs

- Cloud automation enables your Tier 1 sysadmin to easily manage any number of employees and offices from a unified, wizard-based console.
- No more endpoint management. With itopia, you control all worker permissions and data is stored securely on Google Cloud's network.
- Only pay for what you need. Shift from costly, on-premises VDI and harness the lightweight scalability of the cloud.

Success Story

- ✓ Rapidly spun up thousands of virtual desktops & apps in 24 hours for contact center employees [working remotely around the world during the pandemic](#).
- ✓ itopia's automation enabled drastically reduced TCO compared to existing legacy VMware installations.

Unlock Tremendous Value with an OpEx Model and Automation

No more upfront CapEx for procuring servers, storage, networking, power, cooling, or refreshing of hardware.

itopia's Windows 10 App Streaming is a low-cost, subscription-based price. No runaway cloud fees.

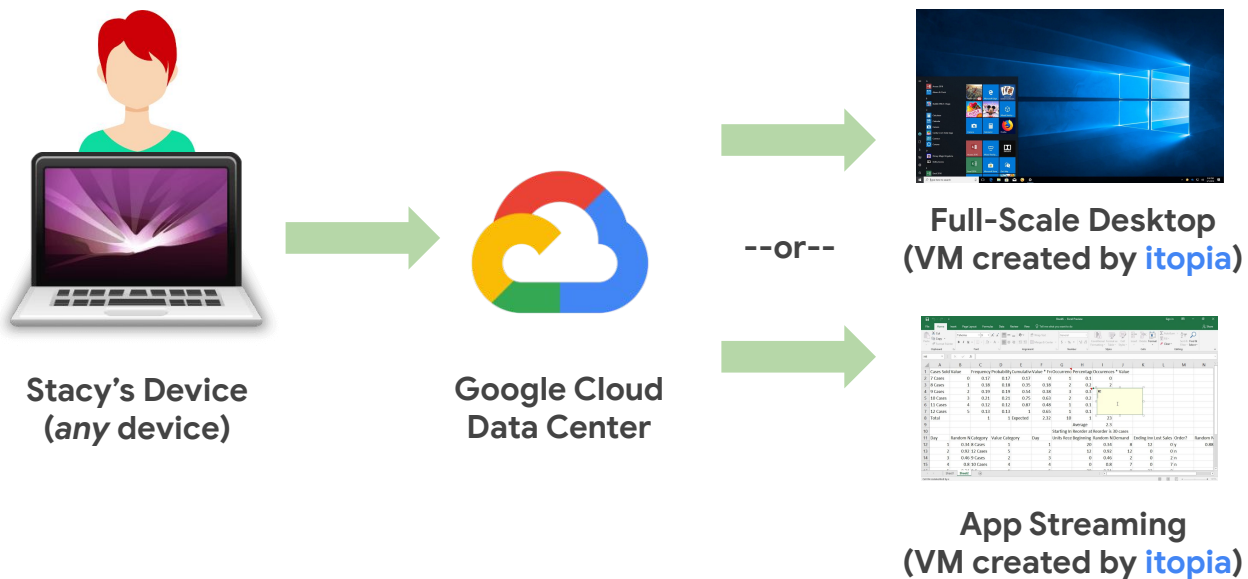

Reduce the IT burden on staff by 65% with itopia's automated lifecycle management.

Technical Differentiation

-  Tier 1 sysadmins can quickly deploy **virtual desktop & apps on Windows 10 and Windows Server VDI environments in 24 hours** -- all from a single, unified console.
-  Collection Pools enable easy segmentation of departments and offices with custom images of apps. **One-click onboarding of employees** with centralized management.
-  Intelligently autoscale compute resources up and down for optimal performance. **Automatically power VMs on and off to match real-time end-user demand.**
-  **All desktop & apps are streamed securely through the browser** -- and all sensitive corporate data is stored securely within your GCP project. itopia's automation & orchestration platform does not have access to your data.

Employees enjoy a one-click login to their Windows 10 apps
